BARTEC QUICK SERVICE TOOL

Keep your complex scan tool working on higher paying, more complicated service work, and use the QST300 instead. The QST300 is an easy to setup and easy to operate tool that resets the Change Oil Light, Relaxes the rear, electronic parking brake, and registers a new battery upon installation. The QST300 is designed to offer powerful yet affordable tool solutions for services like Oil Changes, Brake Pad Replacement and Battery Replacement.

▪ **BATTERY MANAGEMENT**

TECHNOLOGY: The QST recalibrates the necessary control modules after a battery replacement.

▪ **OIL SERVICE LIGHT RESET:** Clears the warning light on the vehicles that requires this step after an oil change.

▪ **ELECTRONIC PARKING BRAKE**

DISENGAGE: The QST300 relaxes the electronic parking brake so that brake service can be completed.

▪ **LARGE DISPLAY:** Easy to see and navigate the very intuitive operation. On screen instruction keeps the repair process moving forward.

▪ **EASY TO UPDATE:** Simply log into the QST300 update suite [free download] and keep your tool up to date. Tool comes with one year's worth of updates. For additional years, update certificates are sold separately.

▪ **BATTERIES NOT REQUIRED:** The QST300 is powered by the car through the OBDII connection.

➔ Revive Engine Cleaner

REVIVE ENGINE CLEANER

A unique product for cleaning Turbo and Direct injection [GDI] engines! Revive is a water based cleaner that is sprayed into the “cold air side” of the intake system. It is very unique in that due to its chemical structure, the product is able to survive the combustion process and clean virtually anything with carbon and soot build up. It is NOT flammable and is SAFE FOR THE ENGINE! Use Revive and avoid potential tear downs.

- **GDI ENGINES HAVE A BUILT IN PROBLEM:** Because fuel is directly injected into the combustion chamber, it does not pass over the valves and other surfaces, as a result carbon builds up causing increasingly poor performance.
- **CLEANS GDI AND TURBO CHARGED ENGINES:** Revolutionary water based formula is able to survive the combustion process and clean more carbon and soot than solvent based cleaners
- **DIRECT APPLICATION:** Revive is applied directly through the cold air intake, and goes right to work on surfaces that have carbon and soot build up.
- **SAFE TO USE:** Revive is water based so no dangerous solvents or flammable liquids to worry about.

Vehicle Exhaust Extraction

PORTABLE EXHAUST REMOVAL SYSTEM

This easy to use portable exhaust extraction system is a practical and affordable solution for effectively removing toxic exhaust fumes from auto repair facilities, motorcycle shops, small engine repair shops and other work areas where toxic fume removal is needed.

- **Positioned next to the vehicle, the high-output suction fan captures fumes and discharges them safely up to 30' away**
- 3/4 HP fan produces 330 CFM air flow
- Uses standard 100V current
- Fan is mounted in tough, integrally molded polyethylene "flow thru" case
- Mobile base makes the EV-5100 easy to position behind the vehicle or move around the shop
- Height position is controlled by a quick-release spring-loaded cam lock
- 30' discharge hose stores easily and neatly when not in use

391-05100

ABOVE GROUND/RAIL SYSTEM

The streamlined, euro-style design will enhance the appearance of your service area.

Sliding crabs eliminate the need for overhead drops at every service bay. They are easily positioned wherever needed.

LIMITLESS FLEXIBILITY: Modular design uses an extruded aluminum exhaust rail and a sliding ventilation crab

- Sliding crab is equipped with an exhaust hose and tailpipe adapter and rolls along the rail
- Easily sized to fit any workspace and adapts quickly to changing needs

MAXIMUM EFFICIENCY, MINIMAL OPERATION COSTS:

- High-efficiency exhaust fan quietly and effectively removes fumes
- Fewer outlets required to cover all of the service bays
- Slides easily out of the way when not in use
- Fewer hose drops and a smaller exhaust fan saves money and reduces energy consumption

VIRTUALLY MAINTENANCE FREE: Easily sized to fit any workspace.

FREE: Rugged aluminum rail design is virtually maintenance free and holds up under heavy use

- No PVC or cast iron pipes to flood, freeze or break

EASE OF USE: Sliding crab system makes it easy to position a drop at any service bay and attach it to the vehicle

- Hoses retract easily when not in use

REDUCES INSTALLATION TIME: Most systems can be engineered using eight basic components

- The "bolt-together" design significantly reduces installation time

ENHANCED PROFESSIONAL IMAGE: Retractable hoses create an organized professional workspace

Interior Protection Products

The Slip-N-Grip® protection system provides total protection for the customer's car while being serviced:

- Covers hold fast to the upholstery: A patented process laminates two distinctly different plastics together - the top layer allows a person to easily slide into and out of the vehicle and the bottom, or gripping layer, keeps the seat cover in place
- Unique process eliminates static electric clinging and wrinkling.

A complete line of vehicle interior protection products are available along with a service center roll dispenser.

PLASTIC FLOOR MAT
