AME Cribbing and Blocking

009

July 3rd, 2017

Prices Expire August 31st, 2017 or while quantities last.

AME Super Stacker™ Cribbing

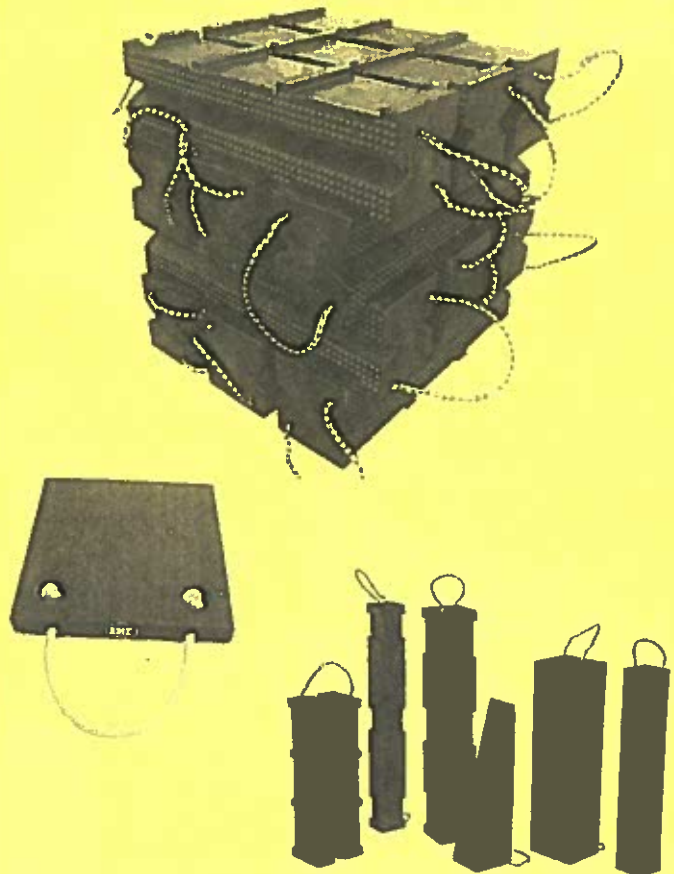

The use of SuperStacker™ cribbing (composite) in applications where wood and lumber were used, represents a commitment to certified safety that will outlast traditional wood cribbing 50 to 1. As it does not deteriorate, rot, splinter or fade; SuperStacker™ Cribbing is the safest choice when servicing Heavy Duty OTR equipment.

SuperStacker™ blocks are designed to provide superior crib stability compared to standard hardwood and softwood products. Unlike wood products, SuperStacker™ cribbing blocks do not splinter or absorb fluids. Convenient sizes help quickly and safely build stable cribs to support loads.

PRODUCT FEATURES:

- Low maintenance
- Ultraviolet stabilizer against ultraviolet degeneration (Will not degrade if exposed to sun)
- Long life expectancy
- No rotting or splitting
- Pyramid surface allows for a variety of stacking patterns
- If needed, SuperStacker™ cuts, drills and secures just like wood
- Environmentally friendly
- Resistant to marine borers, termites, fungus, salt and oils
