## Counteract Motorcycle Balancing Beads

Scan QR Code with your smart phone to see informational video!

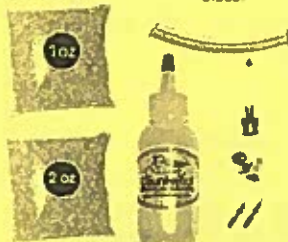

Counteract Balancing Beads for motorcycles provide an automatic, readjusting, trouble-free, lifetime balance of the tire and complete wheel assembly for all locations. When Counteract Balancing Beads are installed inside the tire the specially coated micro-spheres are distributed throughout the tire through centrifugal force as the wheel rotates. As the force of the out-of-balance spot increases and pulls the suspension in an up and down motion, the inertia causes the beads to move in the opposite direction and rapidly shift until complete wheel assembly is balanced.

### Motorcycle, ATV & UTV Do-It-Yourself Kits
