

DHC Battery Tester Promotion

August 21, 2017

Prices Expire October 31, 2017 or While Quantities Last.

RT-777 ★ BT2010 ★ BT2000HD Battery & Starting System Testers

Rubber Inc. announces a special promotion on battery testing equipment. This equipment can lead to significant increases in profit - especially when comparing the low investment cost with the many impressive benefits.

The summer heat of 2017 is destroying batteries. Make sure that your customers have a properly functioning battery before cold temperatures arrive.

DHC BT2010 and RT-777 automotive testers and our BT2000HD heavy duty truck tester will give your customers peace of mind when you show the vehicle battery state of health and state of charge. You can even print results (using the internal printer) to physically show them the results. This tester gives you the power to suggest battery replacement as preventative maintenance rather than emergency replacement.

Unlike with other testers, cables are replaceable if damaged. And, the BT2010, RT-777 and BT2000HD testers are accurate and durable – plus they are backed by a twelve month warranty. Start increasing battery sales by embracing testing and reviewing the results with customers!

The affordable price of this tester helps give you the ability to replace your current outdated tester, replace a leased tester with your own equipment, or add additional testers to your bays to help your team test more batteries!

Testing is, and will remain, the number one way to increase battery sales. Capitalize on battery sales by doing your customers a huge service and test every battery. Market research shows that 30% of batteries tested need replacement.

THIS IS A HUGE OPPORTUNITY! The math is simple: Multiply your car count by 30% of the cars you see each day. By testing every battery in your bays, you will sell more batteries.

Part #
BT2000HD

BT2000HD - Heavy Duty

- Easy-to-Read Intuitive Interface
- Complete Test Report & Customizable Printout with 5 Lines of Personalization
- Self-Feeding Thermal Printer Integrated
- "SPEED CHECK" To Test Battery Packs, Individual Batteries and Electrical Systems
- Replaceable / Detachable 15' Test Cables (Replacement Cable Part # 320B20004)
- Reverse Polarity Protection
- Heavy Duty Blow Molded Plastic Case for Durability
- 12 month Limited Warranty
- Volt Probe & Amp Clamp Accessories Available

BT2000HD Specifications:

Test Range:	CCA: 100-3000 DIN: 60-1685 IEC: 70-1985 EN: 100-2830 JIS: By Part No.
Voltage Range:	1.5Vdc - 60Vdc
Cable Length:	14.8 Feet / 450CM
Application:	Automotive/LTV Group 31 Commercial PowerSport
Operating Temp:	0°C to 50°C (32 F to 122 F)

\$389.00

Part #
BT2010

BT2010 - Automotive

- Easy-to-Read Intuitive Interface
- Complete Test Report & Customizable Printout with 5 Lines of Personalization
- Self-Feeding Thermal Printer Integrated
- Enhanced Flooded Battery (EFB) & AGM Test Availability
- Test START-STOP System Technology With Ease
- Replaceable / Detachable 6' Test Cables (Replacement Cable Part # R201)
- Reverse Polarity Protection
- Heavy Duty Blow Molded Plastic Case for Durability
- 12 month Limited Warranty

BT2010 Specifications:

Test Range:	CCA: 40-3000
Application:	6V & 12V Batteries 12V & 24V Electrical Systems
Voltage Range:	1.5Vdc - 30Vdc
Cable Length:	5.9 Feet / 180CM
Vehicle Types:	Automotive START-STOP
Battery Types:	Regular Flooded AGM Flat Plate AGM Spiral Gel Enhanced Flooded AGM (START-STOP)
Operating Temp:	0°C to 50°C (32 F to 122 F)

\$289.00

Part #
RT-777

RT-777 - Automotive

- Easy-to-Read Intuitive Interface
- Complete Test Report & Customizable Printout with 2 Lines of Personalization
- Enhanced Flooded Battery (EFB) & AGM Test Availability
- Replaceable / Detachable 6' Test Cables (Replacement Cable Part # R771)
- Reverse Polarity Protection
- Heavy Duty Blow Molded Plastic Case for Durability
- 12 month Limited Warranty

RT-777 Specifications:

Test Range:	CCA: 40-2000
Tolerance:	CCA: +/-5% / Voltage: +/- .05V
Voltage Range:	1.5V - 30V
Cable Length:	5.8 Feet / 1.8M
Application:	6V & 12V Batteries 12V & 24V Electrical Systems
Operating Temp:	0°C to 50°C (32 F to 122 F)
