

Why wheel nut indicators are essential

Wheel security is critical in any fleet or heavy-duty operation. A loose wheel nut can lead to serious safety risks, vehicle damage, and costly downtime.

Across transport, logistics, construction, and municipal fleets, operators need simple and reliable ways to monitor wheel integrity without adding complexity to daily inspections.

That's why wheel nut indicators and retainers have become a standard solution in the industry:

- improve safety
- support compliance requirements
- simplify visual inspections
- reduce the risk of wheel-related incidents

Instant visual control, without tools or guesswork

Checkpoint wheel nut indicators are designed to provide immediate visual feedback on wheel nut movement.

Positioned on the nut, they:

- clearly show any rotation or loosening
- allow fast visual checks during walkarounds
- help standardize inspection processes across fleets

Some models also act as retainers, physically helping to keep wheel nuts in position.

**No tools. No measuring. No uncertainty.
Just clear, visible confirmation at a glance.**

Solve problems before they become failures

Traditional inspections rely on manual checks and technician consistency. In high-pressure environments, issues can be missed.

Checkpoint solves this by making problems visible early.

They help fleets and operators:

- detect loosened nuts before failure
- reduce inspection time
- minimize human error
- prevent costly breakdowns and incidents

A simple component that delivers immediate impact on safety and uptime.

**Small components. Big consequences.
Do more with visible safety.**

Choose the right indicator for your application

- By temperature (standard or high temperature)
- By wheel nut size
- By type (retainer or indicator)

Checkpoint
Wheel Nut indicator
(bag of 100 pcs)

Checkpoint
High Temperature
Wheel Nut Indicators
(bag of 100 pcs)

Checktorque - Red
Wheel Nut Indicator
(bag of 100 pcs)

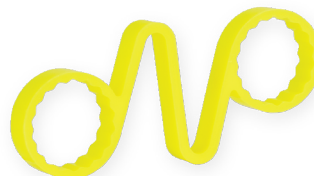

Checkpoint
Medium Arrow
Wheel Nut Indicator
(bag of 100 pcs)

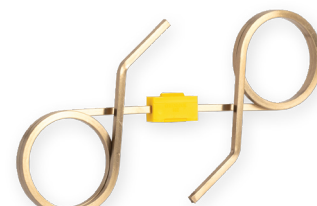

Dustite
Wheel Nut Indicator
and Dust Cap
(bag of 50 pcs)

Dustite
Long Reach Wheel Nut
Indicator and Dust Cap
(bag of 50 pcs)

Checklink
Wheel Nut Indicator
and Retainer
(bag of 50 pcs)

Checklock
Stainless Steel
Wheel Nut Retainer
(bag of 10 pcs)
